

## 2019 LKC Enduro of Stars

### Pit Stop Procedure

Each team will have a minimum of 4 pit stops to complete during the 4 hour enduro.

When each team enters the In-grid and crosses the marked line (near scrutineering shed) in-grid staff will start a stopwatch and then attach the stop watch to the karts Nassau panel. The team will then scale the kart and driver. The scales staff will confirm driver A or B and sign the appropriate decal located on the Nassau panel. This will confirm that the driver and weight has been completed.

During the enduro the Nassau panel decal will be checked to confirm that at least one driver has completed 3 stops whilst the 2<sup>nd</sup> driver has completed 2. One driver will need to complete the minimum time of 1 hour 20 minutes.

**Drives cannot complete back to back stints.**

After the team has passed scales, they can go to their pit area in “Gasoline Alley” and complete their 8 minute pit stop.

**No refueling on outgrid**

When the team enters the out-grid they report to an out-grid staff member who will collect their stopwatch and advise the out-grid control marshal that their 8 minute time has been completed and are free to re-enter the race.

**Drivers must keep to left on the main straight when rejoining.**

Out-grid staff will then need to return the stopwatch to the in-grid staff.
